ARRL: Amateur Radio Relay League, the National Association for Amateur Radio. Please indicate your Membership Status with Y/N (Yes / No) for our club records.

ARES / ACS: Amateur Radio Emergency Service and Auxiliary Communication Service. Please indicate if you having training / experience, so our ARES / ACS Officer can contact you. If you would like to join ARES / ACS, you may answer Yes here as well.

AllStar Node: The AllStar system allows our Internet-Connected repeaters to be used when out of range by radio. Most club users connect to a local repeater with their smartphone when traveling, so they can participate in local nets while away. Please indicate Yes if you would like to be enrolled and given access to this feature, or if you already have access.

Groups.io: A digital Bulletin-Board style website used for club announcements, which can also be setup to forward to your email. This is primarily used for announcements about Upcoming Events, Sales or Hamfests, and other Ham Radio News. **The club's calendar of events can also be found here.** It is recommended that members look here for club information. Please indicate Yes if you would like to request access or if you already have access.

Discord: A more casual, day-to-day, messaging service that members use to connect about more regular events. Typically members share interesting articles, videos, links to resources, discuss equipment, troubleshoot configurations, and chat. Please indicate Yes if you would like to request access or if you already have access.

*AllStar, Groups.io, and Discord all have compatible smartphone apps available on Google Play and the App Store. Groups.io and Discord can also be used on desktop computers or laptops.
